

ANALYSIS OF THE PITE RIVER CATCHMENT TO OPTIMALLY LOCATE 3 REST STOPS WITH PICNIC AREA / MAP 1 OF 2

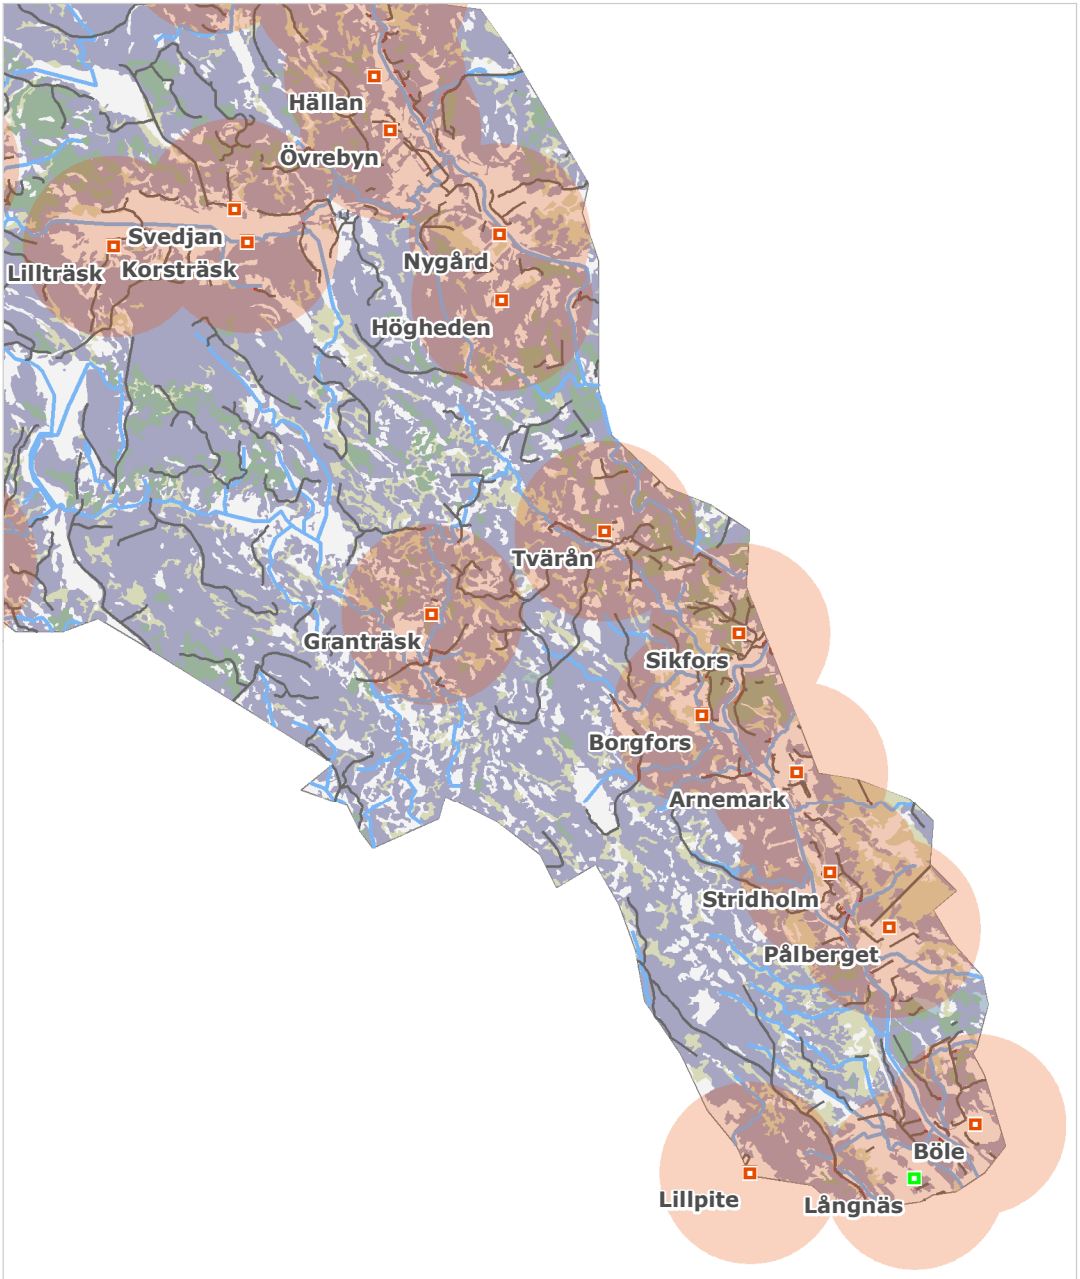

ANALYSIS OF THE PITE RIVER CATCHMENT TO OPTIMALLY LOCATE 3 REST STOPS WITH PICNIC AREA / MAP 2 OF 2

Potential location 1 / Stenudden area

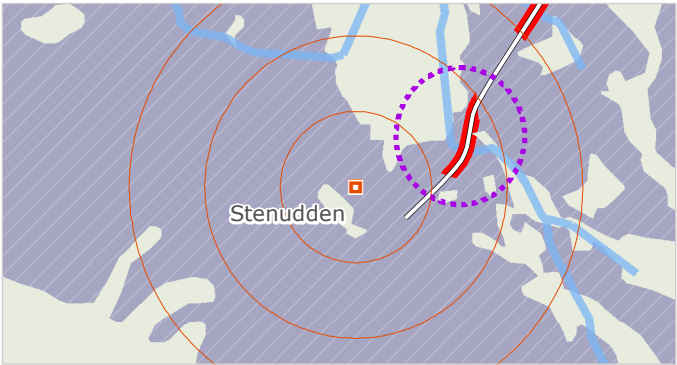

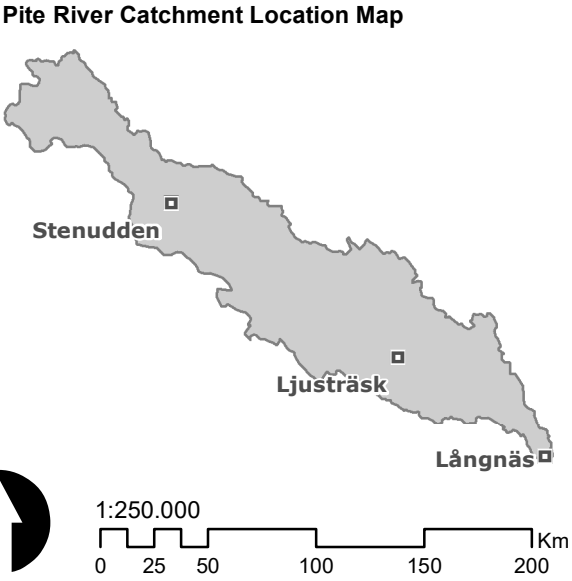

Potential location 2 / Ljusträsk area

Potential location 3 / Långnäs area

- Legend**
- Towns near potential picnic areas
 - Towns and villages
 - 3Km buffer around towns / villages
 - Roads
 - Potential picnic areas
 - Rivers and streams
 - Pite River catchment

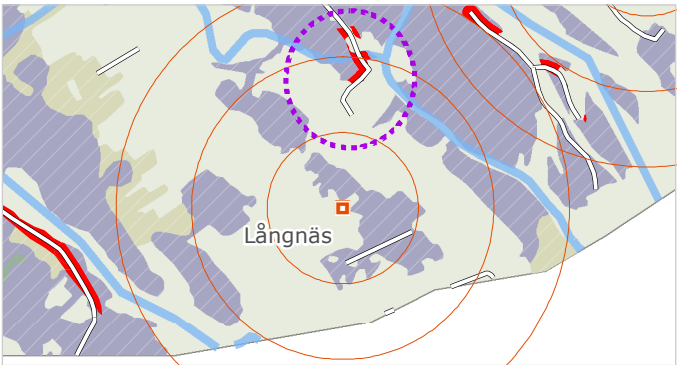

- Conifer types**
- Barrskog, lavristyp
 - Barrskog, lavtyp
 - Fuktig-våt barrskog
 - Lavmarksbarrskog
 - Mossmarksbarrskog
 - Torr-frisk barrskog

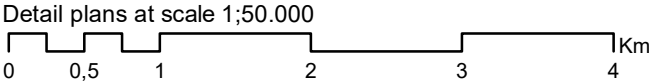

Potential location 1 / Stenudden selected picnic area detail
As well as being conveniently located adjacent to the main access road, as well as across a stream, the selected potential area is within 1000m distance from Stenudden.

Potential location 2 / Ljusträsk selected picnic area detail
Not only its proximity to Ljusträsk, within 1000m distance, but also its location along both the access road and the river, as well as the local diversity of conifers, makes its location of special interest.

Potential location 3 / Långnäs selected picnic area detail
Its proximity to Långnäs, within 1000m distance, as well as its setting across a river, and its diversity of conifers forest, makes of this a special location for a picnic area.

Title:	Location of picnic areas in Pite River catchment 2
Drawing Nr:	Lab2.3 - Map2
Revision / Date:	Rev. 01 / First issue / 2018.02.11
Author:	Pedro J. Muñoz Rodríguez
Data source:	LAB2 data from GIS1 course @ Umeå University
Coordinate system:	SWEREF99_TM
Scale:	1:250.000 / 1:50.000 @ A3L
